**Job Title: Front End Developer****Job Location: Bengaluru, Karnataka, India****Position Overview:**

We are seeking a skilled Software Developer with a focus on Front-End Development with Strong proficiency in HTML, JavaScript, CSS, Sass, Bootstrap and modern JavaScript frameworks including ReactJS and jQuery to join our team. The successful candidate will be responsible for writing clean, efficient, and maintainable code that enhances workflow organization and automates various internal processes within the organization. The role involves continuous improvement of our software solutions to save man-hours and ensure overall organizational efficiency. Key tasks include development, testing, debugging, troubleshooting, and maintenance of both new and existing programs.

Key responsibilities:

- 1) Software Development: Write clean, efficient, and maintainable code/flows that automate internal processes and improve workflow efficiency.
- 2) Testing and Maintenance: Perform testing, debugging, troubleshooting, and daily maintenance of created or integrated programs.
- 3) UI/UX Development and Design: Design and develop intuitive and visually appealing user interfaces in the software.
- 4) Web Services Integration: Integrate UI with web services to ensure seamless functionality.
- 5) Adherence to Standards: Follow preferred development methodologies and adhere to organizational development standards.
- 6) Collaboration: To work closely with other team members to ensure the successful implementation of projects. Maintain clear and concise documentation of code, APIs, and software components to aid in knowledge sharing and future development.
- 7) Stay Current: Keep up to date with the latest developments in the Front end development ecosystem and engage in best practices of software engineering.
